*Seating Place Cards Get a Style Overhaul*

A list bliss display is the *sophisticated evolution* of the outdated, last minute and frustrating to find your name guest seating cards that we are all familiar with. It is the newest, and most *organized* way to show your guests where they will be sitting, without all of the work, without compromising on style. Using your guest list, Twice Nine will design a seating display that will show your guests their seating arrangements, while seamlessly incorporating your event colors and *your style*. Now your guests can avoid the chaos of the last minute rush to locate their seating card, resulting in a smoother transition into your dinner reception. You will save *countless hours* days before and during the event when you no longer need to handwrite the cards one by one and you don't have to set them up at the event individually. Don't forget it is all about *you*, so take the extra time you deserve for yourself!

*the difference is in the details* A list bliss seating display is a presentation board that has your guest list and your chosen design printed on it. It is enforced for strength and stability with matte board. It can be placed on an easel, in a frame or placed on a table during cocktail hour, allowing plenty of time for a guest to find their name and table number before the reception begins. The display size starts at 18 x 24 inches all the way up to 24 x 36 inches depending on the number of guest's names that need to fit onto the display.
